Don’t Lose SmartCharge NY Incentives: Take Action Now!

If you have a home EV charger, it’s important to confirm with your licensed electrician that the installation was reported to Con Edison. Improper or unverified installations may result in your SmartCharge NY incentives being paused or removed.

Why This Matters:

Improper charger installations can lead to serious electrical issues like:

- Fire hazards
- Damage to your home or utility equipment
- Service interruptions

Who’s Affected:

- Customers who recently installed an EV charger
- Customers who aren’t sure if their charger was installed correctly
- SmartCharge NY participants who want to maintain eligibility

What You Need to Do:

Follow these **4 simple steps** to stay eligible for incentives:

1. **Hire a licensed electrician** to inspect or install your home EV charger.
2. The electrician completes and submits all **required paperwork** to Con Edison.
3. Con Edison reviews the information and confirms your home’s electrical system can support the charger.
4. Once approved, you’ll receive confirmation and can continue participating in SmartCharge NY.

Need Help?

If you’re not certain whether your EV charger was properly installed, call **1-800-752-6633**, or speak with a licensed contractor.

Act now to ensure your charger is properly documented so you don’t miss out on your incentives!
